Grupo de trabajo de las escuelas con examen de ingreso

6.4.21

Seguimiento a los niveles de los sectores censales

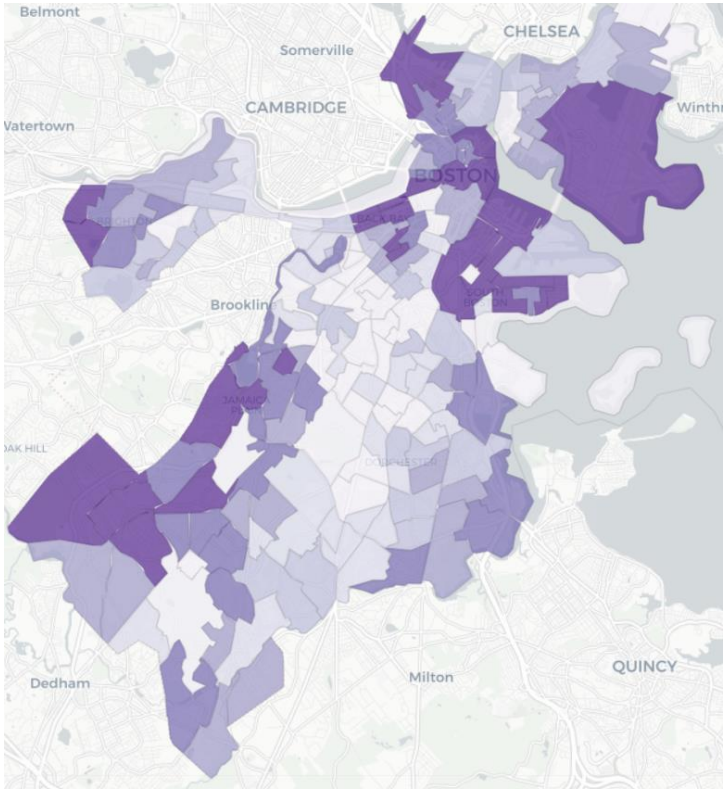
- Consenso en torno a los 8 niveles y la proporcionalidad con los niños en 5º a 8º grado
- Deseo de asegurar que los niveles tengan un tamaño más equilibrado
- Cuatro opciones de niveles para revisar hoy:
  - Opción 1: Variables consistentes con el modelo de Chicago
    - Nivel educativo
    - Ingreso de los hogares
    - Porcentaje de hogares ocupados por sus propietarios
    - Porcentaje de hogares en los que se habla un idioma distinto del inglés
    - Porcentaje de familias encabezadas por un solo padre
  - Opción 2:
    - Eliminar el "porcentaje de hogares en los que se habla un idioma distinto del inglés"
  - Opción 3:
    - Eliminar el "porcentaje de hogares en los que se habla un idioma distinto del inglés"
    - Eliminar la renta media de los hogares y sustituirla por el porcentaje de personas por debajo del nivel de pobreza
  - Opción 4:
    - Eliminar el "porcentaje de hogares en los que se habla un idioma distinto del inglés"
    - Eliminar la renta media de los hogares y sustituirla por el índice de concentración en los extremos [para todos los hogares]

Se añaden dos opciones adicionales

- Opción 5:
  - Eliminar la renta media de los hogares y sustituirla por el porcentaje de personas por debajo del nivel de pobreza
- Opción 6:
  - Eliminar la renta media de los hogares y sustituirla por el índice de concentración en los extremos [para todos los hogares]

NOTA: una versión anterior de esta presentación contenía datos incorrectos para las opciones de nivel 4 y 6. Las tablas de esta presentación se han actualizado.

Índice de concentración en los extremos (hogares con ingresos altos frente a hogares con ingresos bajos)



Comparación general de las opciones de nivel

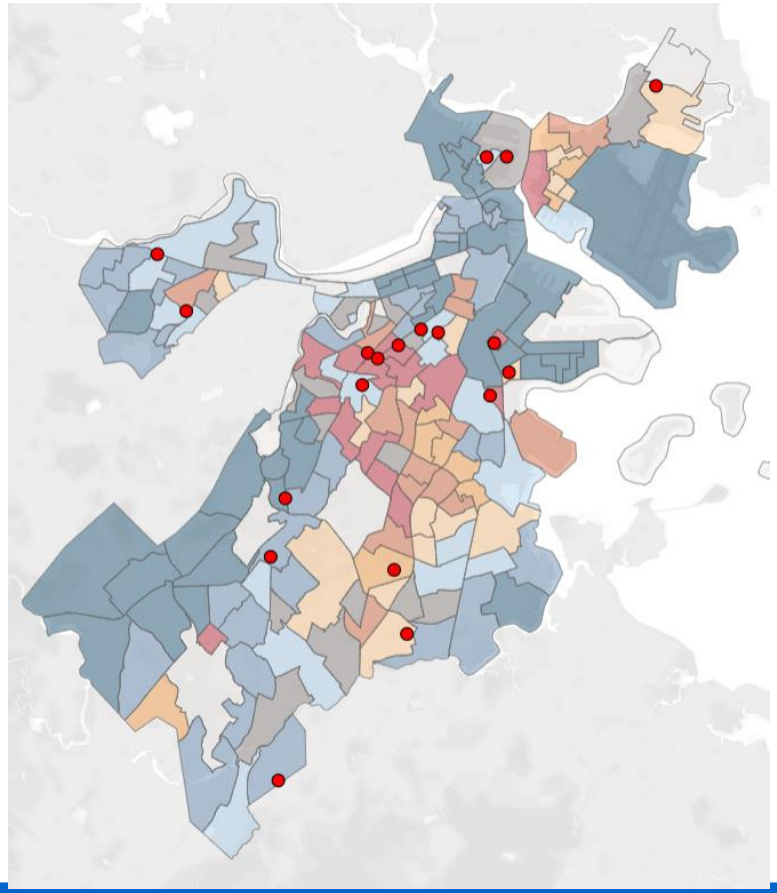
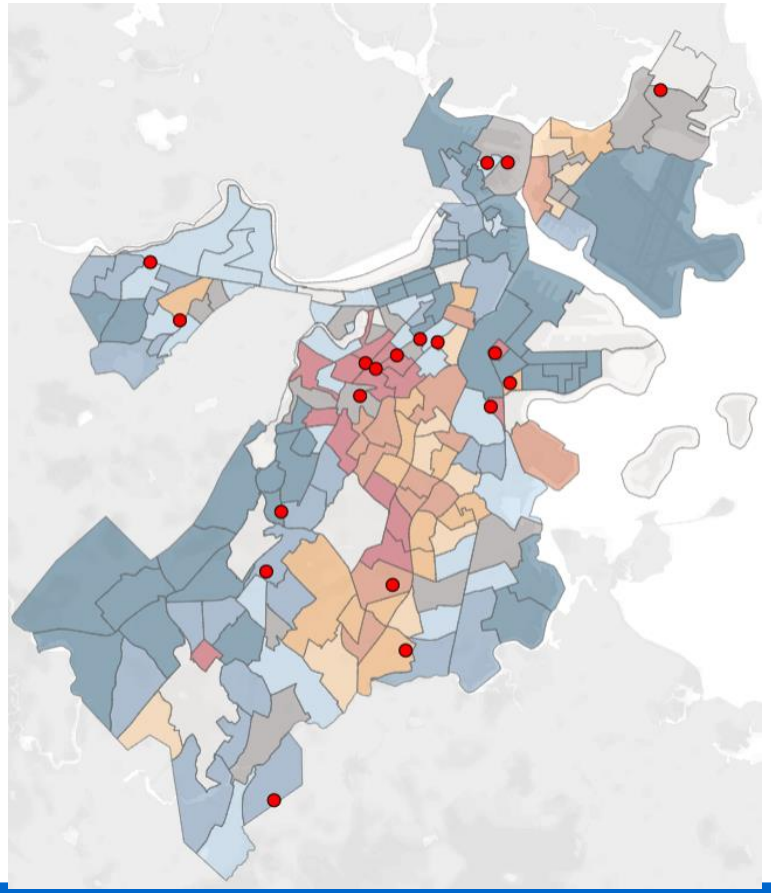
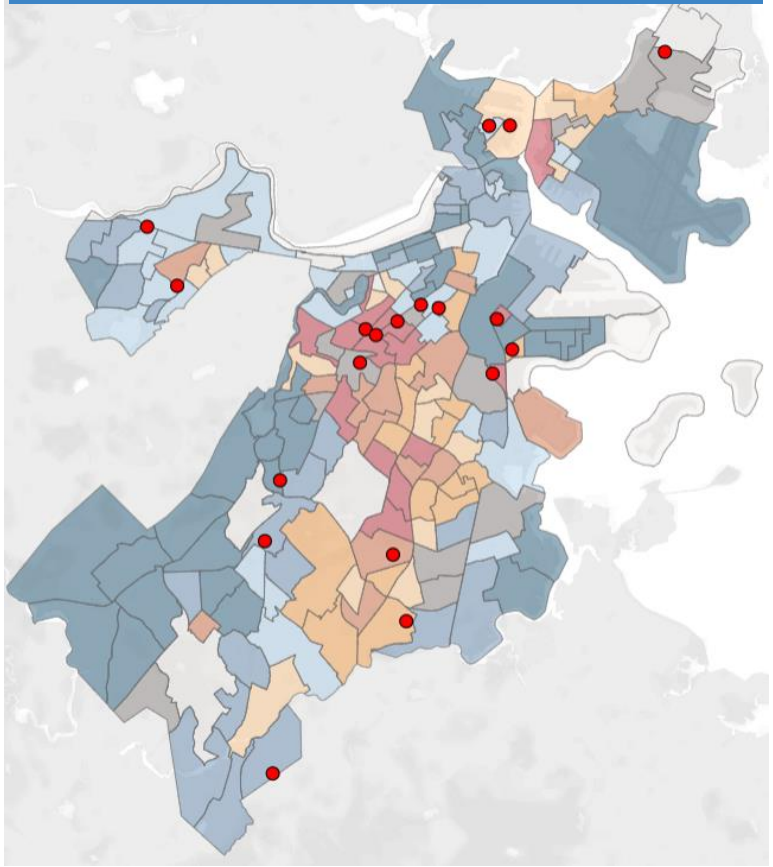
Opción 1: Variables de Chicago



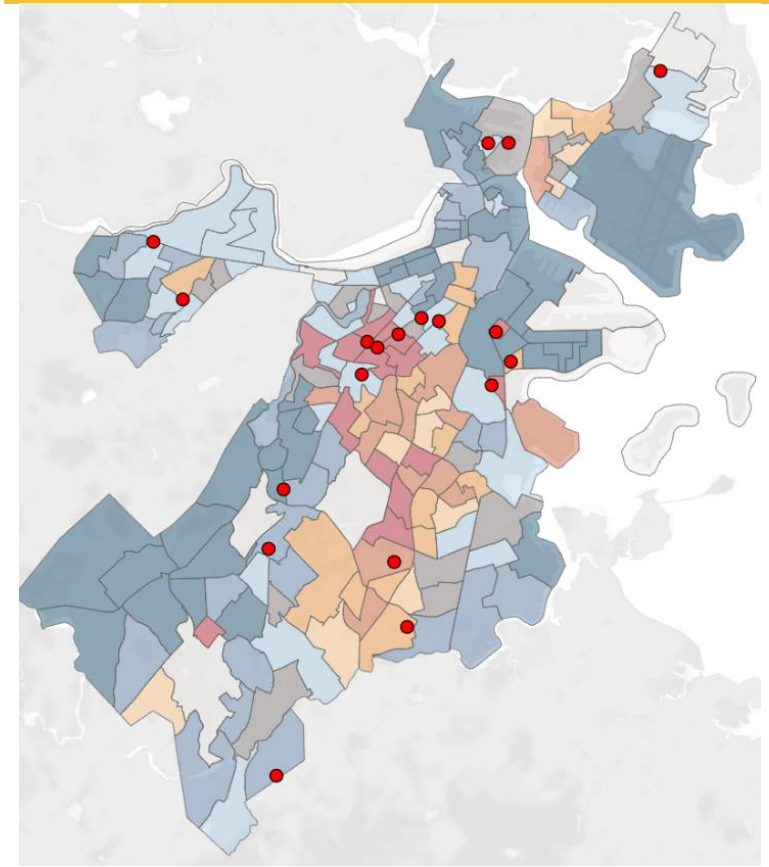
Opción 2: Eliminar la variable del idioma que no inglés



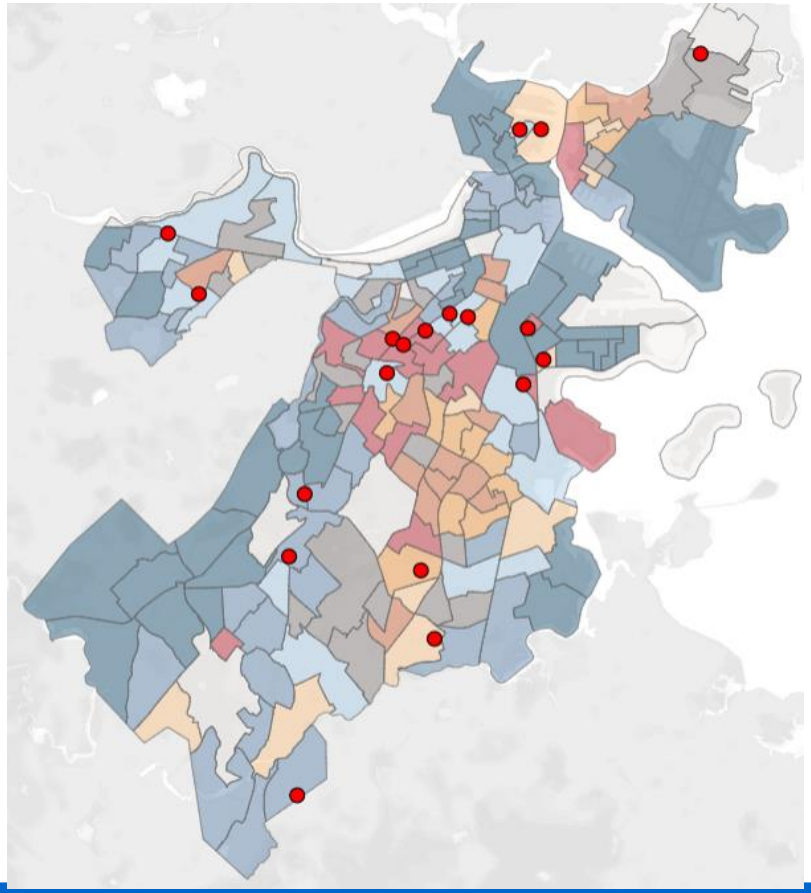
Opción 3: Utilizar la pobreza en lugar de MHHI; no utilizar la variable del idioma



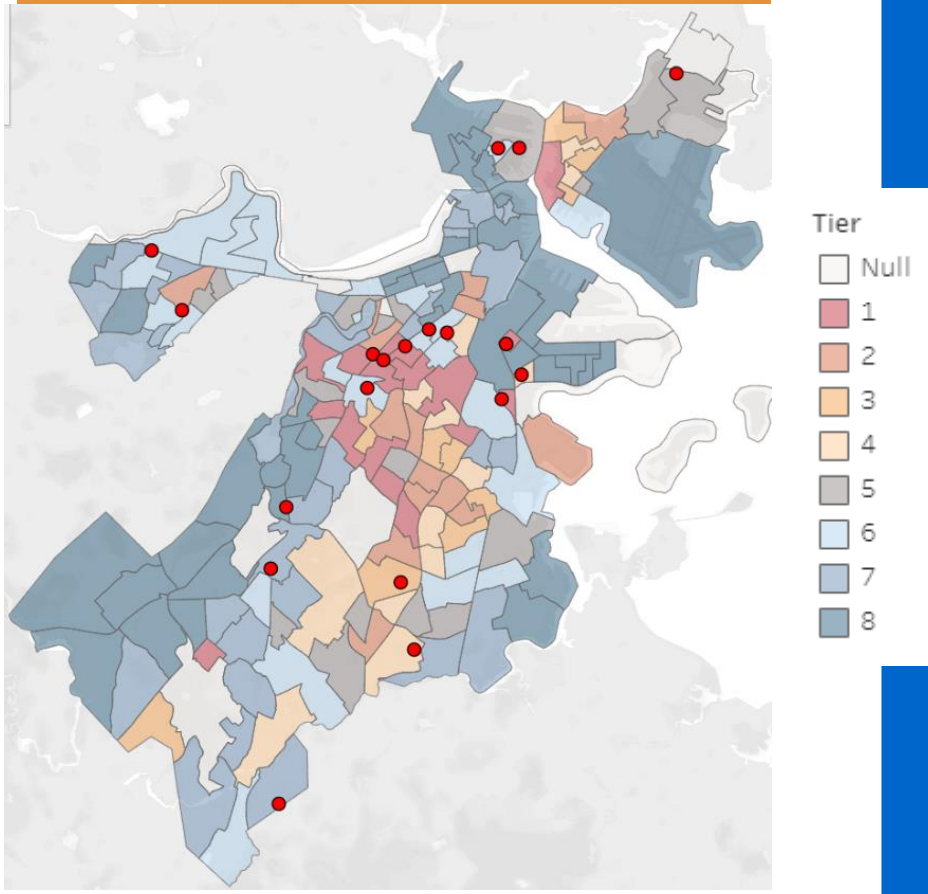
Opción 4: Utilizar el índice en lugar de MHHI; sin la variable del idioma



Opción 5: Utilizar la pobreza en lugar de MHHI



Opción 6: Utilizar el índice en lugar de MHHI



Conjunto de simulaciones 1:
20% distribuido en toda la ciudad, 80% distribuido por niveles

Conjunto de simulaciones 1: 20% toda la ciudad, 80% niveles

- Supuestos en las simulaciones:
  - 1,000 invitaciones para distribuir
  - El primer 20% se distribuye en toda la ciudad (200 invitaciones)
  - El 80% restante se distribuye entre niveles (100 invitaciones por nivel)
- Conjunto de datos para la simulación:
  - Solicitantes de 7º grado para el año escolar SY20-21
  - Se ha recalculado el GPA utilizando sólo las calificaciones de otoño - el GPA no se ha redondeado
  - 50% GPA, 50% puntuación ISEE
- Consideraciones a tener en cuenta:
  - La simulación no incorpora la preferencia escolar
  - Decisión pendiente sobre qué término(s) de calificaciones utilizar para el GPA
  - Decisión pendiente sobre el uso de la evaluación
  - No incorpora ningún criterio de elegibilidad: si los estudiantes tienen un GPA y una puntuación de prueba, se consideran elegibles
  - Faltan datos de la zona censal para los estudiantes fuera de Boston (16 estudiantes en este conjunto de datos)
